Professional Summary

Results-driven **MES Team Lead** with a strong track record of leading successful MES implementations within the automation sector. Experienced in guiding cross-functional teams to optimize manufacturing processes, ensure seamless system integration (SQL, OPC UA), and drive data-centric decision-making. Adept at managing project timelines, mentoring team members, and delivering robust technical solutions aligned with business objectives. Proven leadership in aligning technology with operational goals to enhance overall production efficiency.

Technical Skills

- **MES Platforms:** Opera MES, Sky MES, Aveva MES, HydraX MES
- **SCADA:** Emerson Movicon
- **BMS:** Schneider EcoStruxure
- **Cybersecurity:** Waterfall Cybersecurity
- **Databases:** Microsoft SQL Server, PostgreSQL
- **Programming Languages:** SQL, JavaScript, HTML & CSS
- **SAP/ERP Integration:** SSIS, Direct Database Integration, File-Based Interfaces, Node-RED
- **Protocols:** OPC UA, OPC DA, Modbus TCP/IP
- **Communication Tools:** KepServerEX, Omni Server, Emerson Connex, ModScan, Matrikon OPC, RSLinx Classic
- **Reporting Tools:** DevExpress, Telerik Reporting, Crystal Reports
- **PLC Programming:** Ladder Logic
- **PLC Programming Tools:** Siemens TIA Portal, RSLogix 500, KV Studio
- **Hardware & System Integration:** Physical integration of industrial devices, installation and configuration of MES and associated software.
- **Support & Maintenance:** Post-deployment MES support, system troubleshooting, performance monitoring and optimization.
- **Other Skills:** Electrical Maintenance, CNC/Robot Operation
- **Languages:** English, Malayalam, Hindi, Tamil

Professional Experience

MES Consultant – Capgemini, Pune – Hybrid

11/2025 – Present

- Working as part of the MES consulting team for a global semiconductor project.

- Involved in end-to-end implementation and configuration of the MPDV HydraX MES platform.
 - Prepared and supported documentation including User Requirement Specifications (URS) and Functional Requirement Specifications (FRS) based on client requirements.
 - Handled installation and deployment of HydraX MES software in client environments.
 - Configured key MES modules such as Order Management, MIP Administration, Shopfloor Pages, Resource Management, and Advanced Planning.
 - Gaining experience in semiconductor manufacturing processes with focus on quality, traceability, and data accuracy.
-

Major Projects Handled

- MES Implementation for Semiconductor Manufacturing – Client: Infineon Technologies (Germany)

Team Lead - MES, Protocol Automation Technologies Pvt. Ltd., Bangalore – Hybrid 08/2022 – Present

- Lead engineer responsible for complete end-to-end implementation of Manufacturing Execution Systems (MES) across various industrial domains.
- Engaged in requirement gathering, client discussions, and documentation of Scope of Work (SOW) and User Requirement Specifications (URS).
- Installed and configured SQL Server, PostgreSQL, MES applications, Communication tools on production servers for real-time data capture.
- Established OPC UA/DA, Modbus TCP/IP communication bridges to integrate MES with industrial devices including PLCs, scanners, and RFID systems.
- Designed and implemented MES modules with workflows and SQL procedures for production tracking, quality checks, inventory handling, barcode-based material traceability, reporting dashboards, and planning & scheduling, enabling real-time monitoring across multi-stage production lines.
- Enabled automatic image rendering for visual inspections by linking MES to image paths via dynamic procedures.
- Automated report generation using SQL, DevExpress, Telerik Reports and Crystal reports delivering real-time dashboards and production reports.
- Captured machine and device downtimes within MES and designed OEE monitoring dashboards to calculate availability, performance, and quality metrics for Overall Equipment Effectiveness (OEE) analysis.
- Set up planning and scheduling modules within MES to align production plans with actual machine status and inventory.
- Implemented alarms and notification systems (screen pop-ups, email, WhatsApp) to alert management and operators of critical issues in real time.
- Integrated MES with ERP/SAP systems and external databases to ensure synchronized material transactions, BOM tracking, and work order execution.
- Used Node-RED to integrate MES with ERP systems via CRUD APIs, enabling two-way data transactions.
- Built custom takt dashboards in OperaMES using JavaScript, HTML, CSS, and SQL files. These dashboards showed real-time production data like machine cycle times, shift-wise performance, and planned vs actual output across hourly, daily, weekly, and monthly intervals.
- Played a key role in shopfloor digital transformation, enhancing transparency, traceability, and operational efficiency across plants.
- Worked on Movicon SCADA for screen designing, reporting, and real-time visualization

- Designed monitoring screens for Schneider BMS (Building Management System) including ventilation, sensors, and utility layouts.

Major Projects Handled

- MES Implementation for Solar Panel Production in Swelect Energy Systems Ltd., Chennai
- MES Implementation for Pipe Manufacturing Unit in Polyhose Pvt. Ltd., Chennai
- MES Implementation for Paper Production Line in WESCO, Dandeli
- MES Implementation for Water Pump Assembly Line in Devendra Autocom Pvt. Ltd., Chennai

Mechatronics Technician - BFG International, Bahrain – Onsite

07/2017 – 06/2019

-
- Maintained and repaired CNC machines (Bellotti, FlexiCAM) and KUKA robots.
 - Performed daily electrical maintenance tasks.
 - Operated CNC machines and robotic systems in production.
 - Worked with 3-phase power supply and electrical distribution.
 - Performed preventive and breakdown maintenance on equipment like air compressors, vacuum pumps, overhead cranes, motors, chillers, and AC units.

Jr. Electrical Engineer – Mektronik Solutions Pvt. Ltd., Bangalore – Hybrid

05/2016 – 06/2017

-
- Carried out electrical wiring and panel assembly for sensors, PLCs, and actuators.
 - Programmed PLCs for automating custom machines and production lines.
 - Troubleshoot and maintained electrical systems and automated equipment.
 - Created and updated documentation such as wiring diagrams and maintenance logs.

Education

- B. Tech in Applied Electronics and Instrumentation Engineering
Vimal Jyothi Engineering College, Chemperi, Kannur
Aug 2019 – Aug 2022
- Professional Diploma in Industrial Automation
Continuous education center, GEC Thrissur
Oct 2016 – Apr 2017
- Diploma in Applied Electronics and Instrumentation Engineering
Govt. Polytechnic College, Mattannur, Kannur
July 2013 – July 2016

Certifications

- Waterfall Cyber Security Sale certificate
- Waterfall Cyber Security Pre Sale certificate
- AVEVA™ Manufacturing Execution System - Operations eLearning Curriculum

Personal Details

- DOB : 12th January 1996
- Marital Status : Single
- Nationality : Indian
- Passport No : P9855436

Hobbies

- Coding
- Travelling

Languages

- English : Read, Write, Speak
- Malayalam : Read, Write, Speak
- Hindi : Read, Write, Speak
- Tamil : Speak
